INTRODUCTION

The Council of Teaching Hospitals (COTH) of the Association of American Medical Colleges is pleased to present its twelfth annual Directory of COTH Membership. In October of 1967 the Council published a 1967-68 membership roster. Since that time, COTH has attempted to provide a comprehensive profile of its members each year.

In order to update the data and information, in September each administrator was requested to complete a data worksheet for the most recent fiscal year. The only exceptions to the most recent fiscal year basis are house staff statistics, which have been reported as of August, 1979.

Facility and approval codes have been excerpted from *American Hospital Association, Guide to the Health Care Field, 1979.* Medical school affiliations have been obtained from the *Directory of Residency Training Programs, 1978-79, Accredited by the Liaison Committee on Graduate Medical Education.* Due appreciation is expressed to the American Hospital Association and the American Medical Association for their willingness to grant permission for use of respective data and definitions.

The number of total births appear in parentheses beneath census. Corresponding Members and Newly elected members are listed in the rear of the Directory.

COTH MEMBERSHIP

The Council as of this publication lists among its members 410 teaching hospitals in the United States, Puerto Rico, the Canal Zone, and Beirut.

MEMBERSHIP CRITERIA

There are two categories of COTH membership: teaching hospital membership and corresponding membership. Both membership categories require the applicant institution to have a documented affiliation agreement with a medical school accredited by the Liaison Committee on Medical Education and a letter recommending membership from the dean of the affiliated medical school.

Teaching Hospital membership is limited to not-for-profit—IRS 501(C)(3)—and publicly-owned hospitals which sponsor, or significantly participate in, at least four approved, active residency programs. At least two of the approved residency programs must be in the following specialty areas: internal medicine, surgery, obstetrics-gynecology, pediatrics, family practice, or psychiatry. Other considerations evaluated in determining a hospital's participation in medical education activities are:

—the availability and activity of undergraduate clerkships;

—the presence of full-time chiefs of service or a director of medical education;

—the number of internship and residency positions in relation to bed size, the proportion (in full-time equivalents) which are filled, and the proportion which are filled by foreign medical graduates;

—the significance of the hospital's educational programs to the affiliated medical school and the degree of the medical school's involvement in them; and

—the significance of the hospital's financial support for medical education.

In the case of specialty hospitals—such as children's, rehabilitation, and psychiatric institutions—the COTH Administrative Board is authorized to make exceptions to the requirement of four residency programs provided that the specialty hospital meets the membership criteria within the framework of the specialized objectives of the hospital.

Teaching hospital members receive the full range of AAMC and Council services and publications. In addition, their COTH representatives are eligible to participate in the AAMC's governance, organization, and committee structure. Present teaching hospital membership dues are $1,750 per year.

Non-profit and governmental hospital and medical education organizations (e.g., consortia, foundations, federations) not eligible for teaching hospital membership may wish to apply for corresponding membership. Corresponding members are eligible to attend all open AAMC meetings and to receive the following publications: COTH Report; President's Weekly Activities Report; Assembly Memoranda; COTH, CAS, and COD Memoranda; Journal of Medical Education; Survey of House Staff Policy; COTH Executive Salary Survey, and other periodic publications and surveys. Corresponding membership dues are $600 per year. Hospitals which are eligible for teaching hospital membership are not eligible for corresponding membership.

The criteria set forth to obtain membership in the Council of Teaching Hospitals were established to provide a basis from which hospitals could organize and promote the hospital as an educational institution. Hospitals differ greatly in the extent of their commitment to educational purposes. Membership in COTH-AAMC should not be utilized as a reimbursement category or as an independent element to construct such categories. Additionally, membership should not be employed to classify hospitals in a research study or for administrative purposes unless specific qualifications and/or controls are employed in this analysis.

At least three major dimensions must be considered when attempting to classify or characterize teaching hospitals:

(1) the severity of illness and complexity of diagnosis which patients bring to the hospital;

(2) the comprehensiveness and/or intensiveness of services provided by the hospital; and

(3) the institutional commitment to the incremental costs of providing the environment for undergraduate and graduate medical education.

There is a great variation in the extent to which each teaching hospital meets these dimensions. Any attempt to characterize or classify the COTH membership must recognize the limitations of grouping all teaching hospitals based upon their membership in COTH.

MEDICAL SCHOOL AFFILIATIONS

M—Major affiliation signifies that the hospital is an important part of the teaching program of the medical school and is a major unit in the clinical clerkship program and will participate in any graduate medical education programs of the medical school.

L—Limited affiliation with a medical school indicates that the hospital is used in the school's teaching program only to a limited extent.

G—Graduate affiliation with a medical school indicates that the hospital is used by the school for graduate training programs. This designation is used only for hospitals not designated as Major or Limited.

X—Hospital owned by a university (in several instances by an independently incorporated medical school).

Footnotes 10 to 132 refer to medical schools affiliated with hospitals for undergraduate clinical clerkships and graduate education.
